Regression Test Report

SRM PRIME Approval System - pre-release regression

Date	14 Oct 2026
Build under test	Git b3a04a9 plus the changes in section 2 (the release commit contains exactly the tested working tree)
Environment	Isolated local stack: FastAPI + disposable PostgreSQL 16 (Docker, port 55432) + Vite dev server, Chromium (Playwright). No production system, data or credentials were touched.
Tools	pytest (backend), Playwright (browser E2E + API), Vite build, ESLint

1. Summary

157/157	59/59	Pass	0 / 6
Backend tests passed	Browser/E2E tests passed	Build	Lint errors: app source / test harness

Verdict: no regressions found. Release recommendation: ready, with the notes in section 6.

Check	Result
Backend suite (pytest, real DB)	157 passed, 0 failed
Browser E2E (Playwright, Chromium)	59 of 59 behaved as expected (0 unexpected failures, 0 flaky)
Frontend production build (vite build)	Success
Frontend lint (eslint .)	0 errors in src/. 6 errors (no-undef for process/Buffer) in frontend/playwright.config.js and frontend/e2e/support/helpers.js, where Node globals are not declared for test files. 1 pre-existing warning (react-hooks/incompatible-library) in CreateRequest.jsx.

2. Changes in this release

- **Head of Institution can choose the approval category.** On Create Request, a user with role HEAD_OF_INSTITUTION gets a dropdown of every approval flow (pre-filled from the request type). The backend honours the chosen requestCategory on create only for that role and rejects invalid values with 400. For every other role the category is still derived from the request type and any client value is ignored (existing backend test covers this).
- **Request body size cap removed.** BodySizeLimitMiddleware is no longer registered, so the application never returns HTTP 413 for large JSON bodies (multipart uploads were already uncapped). Proxy/CDN limits outside this repository are not covered.
- **Test maintenance:** backend test_hardening::test_large_json_body_is_never_rejected_with_413 and e2e API-05 previously asserted a 413 above the cap; they now assert the opposite. A stray "on" at the start of e2e/tests/03-request-lifecycle.spec.js (a syntax error that stopped the suite) was removed.

3. Backend regression results (pytest)

Area	Tests	Passed
auth	17	17
completed	5	5
email	14	14
files	9	9
flagged	3	3
form_configs	3	3
policies	4	4
queries	11	11
requests	36	36
sops	16	16
tasks	11	11
test_frontend_contract	6	6
test_hardening	6	6
test_health	1	1
test_smoke	1	1
test_trusted_proxy	7	7
users	7	7
Total	**157**	**157**

4. Browser and API end-to-end results (Playwright)

Area	Tests	As expected
Authentication & platform API	14	14
Navigation & role-based access (RBAC)	22	22
Request lifecycle & Create Request form	14	14
Profile, content pages & error handling	9	9
Total	**59**	**59**

Complete list

Area	Test	Result	Time
Authentication & platform API	AUTH-01 login page renders	PASS	3.1s
Authentication & platform API	AUTH-02 valid login by email lands on the dashboard	PASS	1.7s
Authentication & platform API	AUTH-03 valid login by employee ID	PASS	1.5s
Authentication & platform API	AUTH-04 wrong password shows an error and stays on login	PASS	1.4s

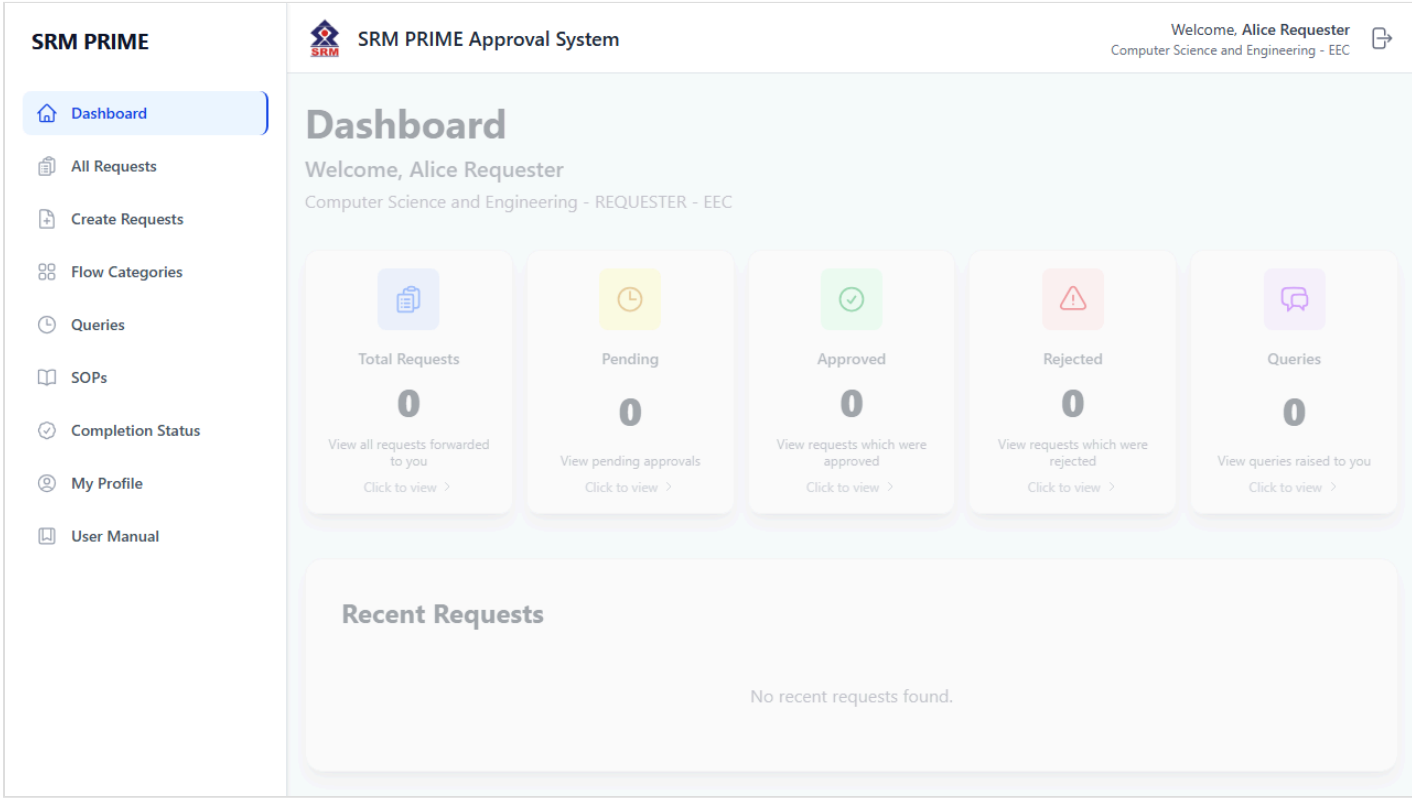

Authentication & platform API	AUTH-05 protected pages redirect anonymous visitors to login	PASS	2.5s
Authentication & platform API	AUTH-06 session survives a page reload (refresh cookie)	PASS	2.0s
Authentication & platform API	AUTH-07 logout ends the session	PASS	2.0s
Authentication & platform API	AUTH-08 forgot-password page is reachable from login	PASS	1.0s
Authentication & platform API	AUTH-09 already signed-in user visiting /login is sent to dashboard	PASS	1.9s
Authentication & platform API	API-01 /ping is public and returns 200	PASS	0.0s
Authentication & platform API	API-02 protected endpoints reject missing tokens with 401	PASS	0.0s
Authentication & platform API	API-03 login returns an access token and sets an httpOnly refresh cookie	PASS	0.1s
Authentication & platform API	API-04 security headers are present	PASS	0.0s
Authentication & platform API	API-05 very large JSON body is never rejected with 413	PASS	2.0s
Navigation & role-based access (RBAC)	RBAC-NAV REQUESTER: sidebar shows only permitted entries	PASS	1.3s
Navigation & role-based access (RBAC)	RBAC-NAV INSTITUTION_MANAGER: sidebar shows only permitted entries	PASS	1.3s
Navigation & role-based access (RBAC)	RBAC-NAV HEAD_OF_INSTITUTION: sidebar shows only permitted entries	PASS	1.4s
Navigation & role-based access (RBAC)	RBAC-NAV DIRECTOR_ADMIN: sidebar shows only permitted entries	PASS	1.3s
Navigation & role-based access (RBAC)	RBAC-NAV CHAIRMAN: sidebar shows only permitted entries	PASS	1.5s
Navigation & role-based access (RBAC)	RBAC-NAV CHAIRMAN_OFFICE: sidebar shows only permitted entries	PASS	1.4s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /requests	PASS	1.8s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /create-request	PASS	1.6s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /flow-categories	PASS	1.8s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /queries	PASS	1.8s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /sops	PASS	2.2s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /completion-status	PASS	2.1s
Navigation & role-based access (RBAC)	PAGE REQUESTER can open /my-profile	PASS	1.7s
Navigation & role-based access (RBAC)	PAGE HEAD_OF_INSTITUTION can open /policies	PASS	1.7s

Navigation & role-based access (RBAC)	PAGE HEAD_OF_INSTITUTION can open /create-policy	PASS	1.7s
Navigation & role-based access (RBAC)	PAGE HEAD_OF_INSTITUTION can open /flagged	PASS	1.8s
Navigation & role-based access (RBAC)	PAGE HEAD_OF_INSTITUTION can open /user-management	PASS	1.8s
Navigation & role-based access (RBAC)	PAGE DIRECTOR_ADMIN can open /workflow	PASS	1.7s
Navigation & role-based access (RBAC)	PAGE CHAIRMAN_OFFICE can open /create-sop	PASS	1.6s
Navigation & role-based access (RBAC)	RBAC-GUARD requester opening Create Policy is denied	PASS	1.7s
Navigation & role-based access (RBAC)	RBAC-GUARD non chairman-office user opening Create SOP is denied	PASS	1.6s
Navigation & role-based access (RBAC)	RBAC-API requester cannot list users	PASS	0.1s
Request lifecycle & Create Request form	REQ-01 new request is created at the Institution Manager stage	PASS	0.2s
Request lifecycle & Create Request form	REQ-02 requester sees their request in All Requests and can open it	PASS	2.2s
Request lifecycle & Create Request form	REQ-03 stage holder (Institution Manager) gets the Process Request action	PASS	1.9s
Request lifecycle & Create Request form	REQ-04 forwarding a zero-cost request skips the accountant (UI reflects new stage)	PASS	2.0s
Request lifecycle & Create Request form	REQ-05 forwarding a request with a cost estimate goes to the accountant	PASS	0.1s
Request lifecycle & Create Request form	REQ-06 the requester cannot forward their own request past the approvers	PASS	0.3s
Request lifecycle & Create Request form	REQ-07 a user at the wrong stage cannot forward (HOI cannot act at IM stage)	PASS	0.2s
Request lifecycle & Create Request form	REQ-08 rejecting a request moves it to REJECTED and the UI shows it	PASS	2.0s
Request lifecycle & Create Request form	REQ-09 request list filters: Pending / Rejected tabs respond	PASS	2.1s
Request lifecycle & Create Request form	REQ-10 request without an attachment is refused by the API	PASS	0.0s
Request lifecycle & Create Request form	FORM-01 submitting an empty form shows validation errors and does not navigate	PASS	1.9s
Request lifecycle & Create Request form	FORM-02 short titles/purposes are accepted (no minimum length); empty is still required	PASS	1.9s

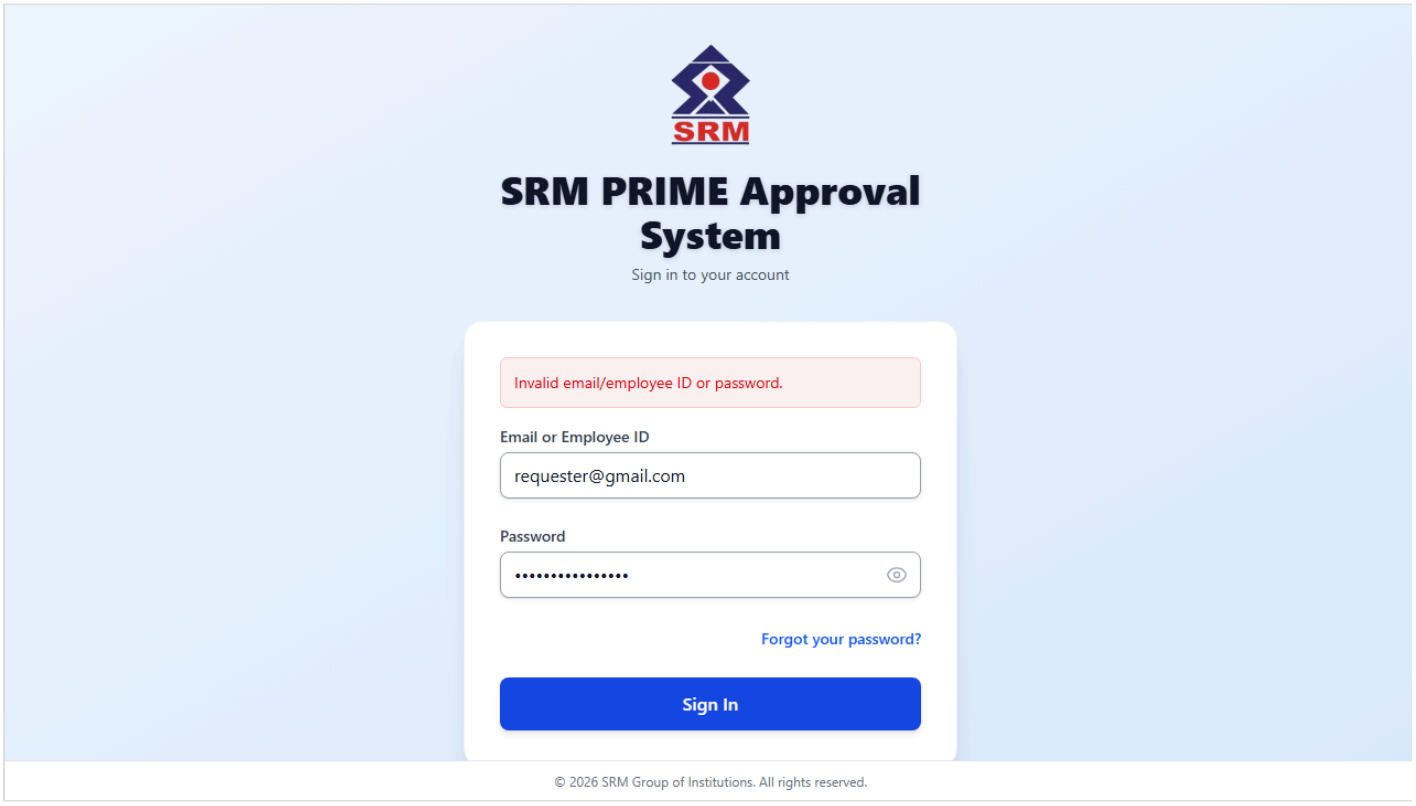

Request lifecycle & Create Request form	FORM-03 picking a request type reveals its approval category	PASS	1.8s
Request lifecycle & Create Request form	FORM-04 requester submits an MOU request through the form and lands on its detail page	PASS	3.0s
Profile, content pages & error handling	MISC-01 My Profile shows the signed-in user's details	PASS	2.0s
Profile, content pages & error handling	MISC-02 /users/me matches the seeded account	PASS	0.1s
Profile, content pages & error handling	MISC-03 Flow Categories reference page lists categories	PASS	2.0s
Profile, content pages & error handling	MISC-04 Queries and Completion Status render empty states without errors	PASS	2.6s
Profile, content pages & error handling	MISC-05 Head of Institution user management lists users	PASS	1.8s
Profile, content pages & error handling	MISC-06 dashboard renders for every seeded approval role without JS errors	PASS	9.4s
Profile, content pages & error handling	MISC-07 unknown route does not crash the shell	PASS	1.9s
Profile, content pages & error handling	MISC-08 opening a non-existent request shows an error state, not a blank page	PASS	2.1s
Profile, content pages & error handling	MISC-09 mobile viewport collapses navigation into a drawer	PASS	1.2s

5. Evidence (screenshots captured at the end of each test)

AUTH-02 valid login by email lands on the dashboard - PASS

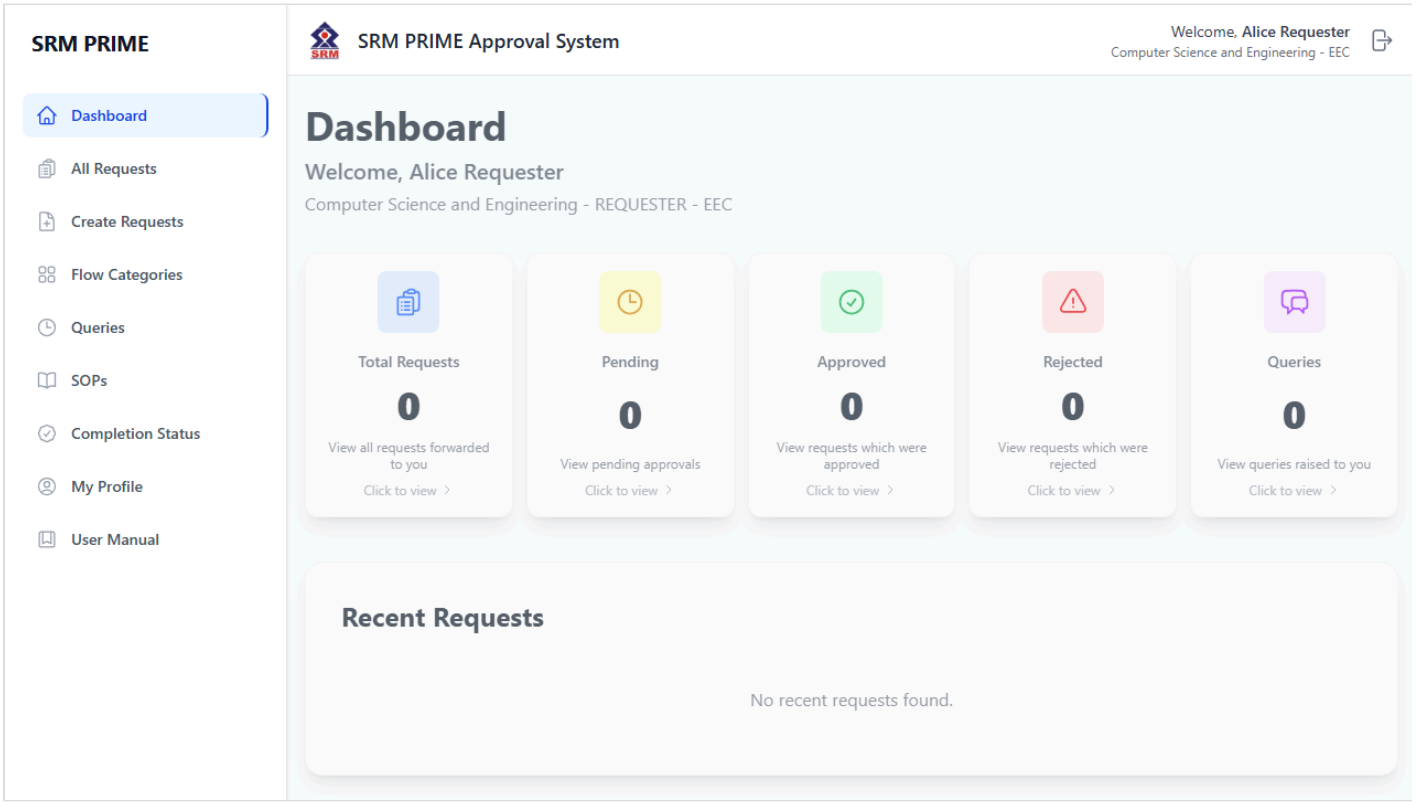

AUTH-04 wrong password shows an error and stays on login - PASS

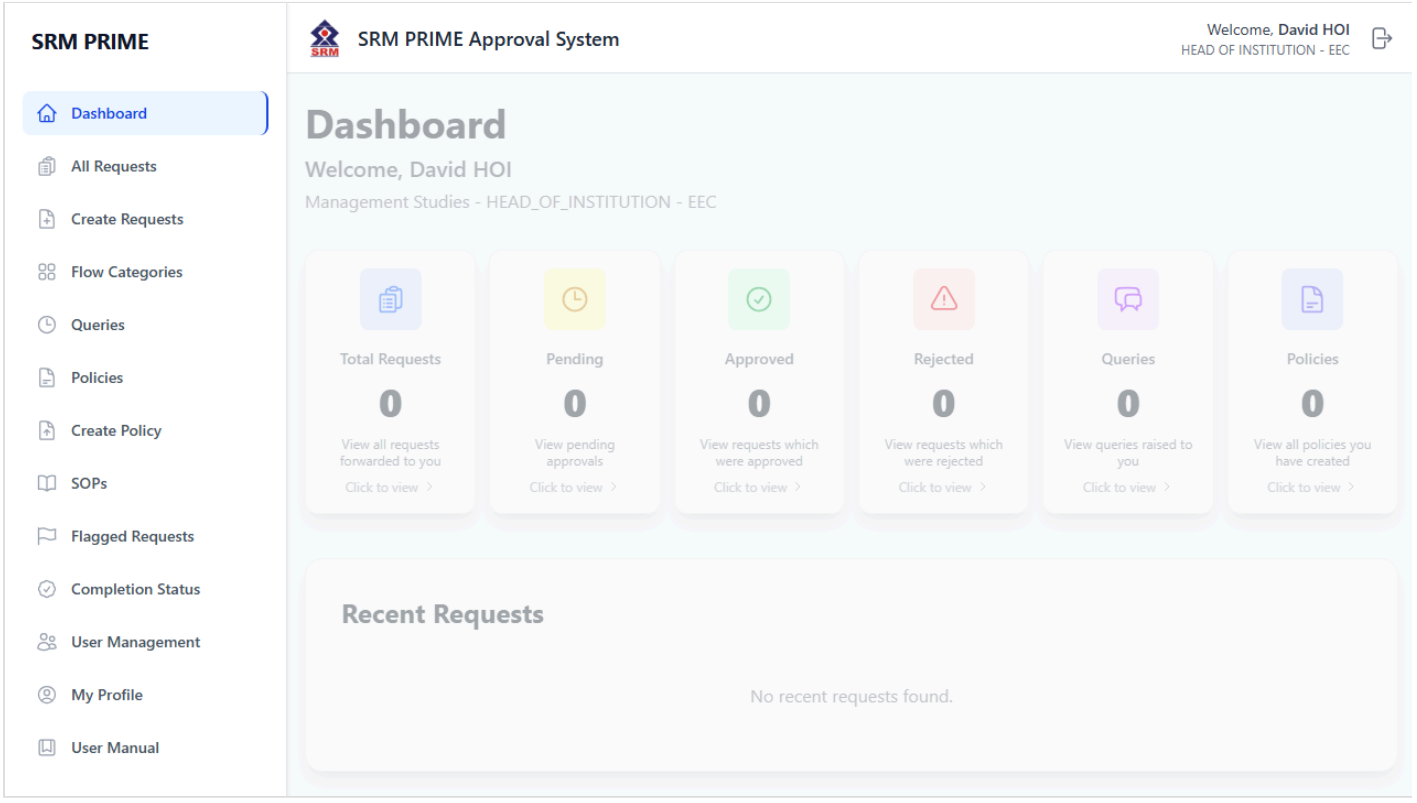

AUTH-05 protected pages redirect anonymous visitors to login - PASS

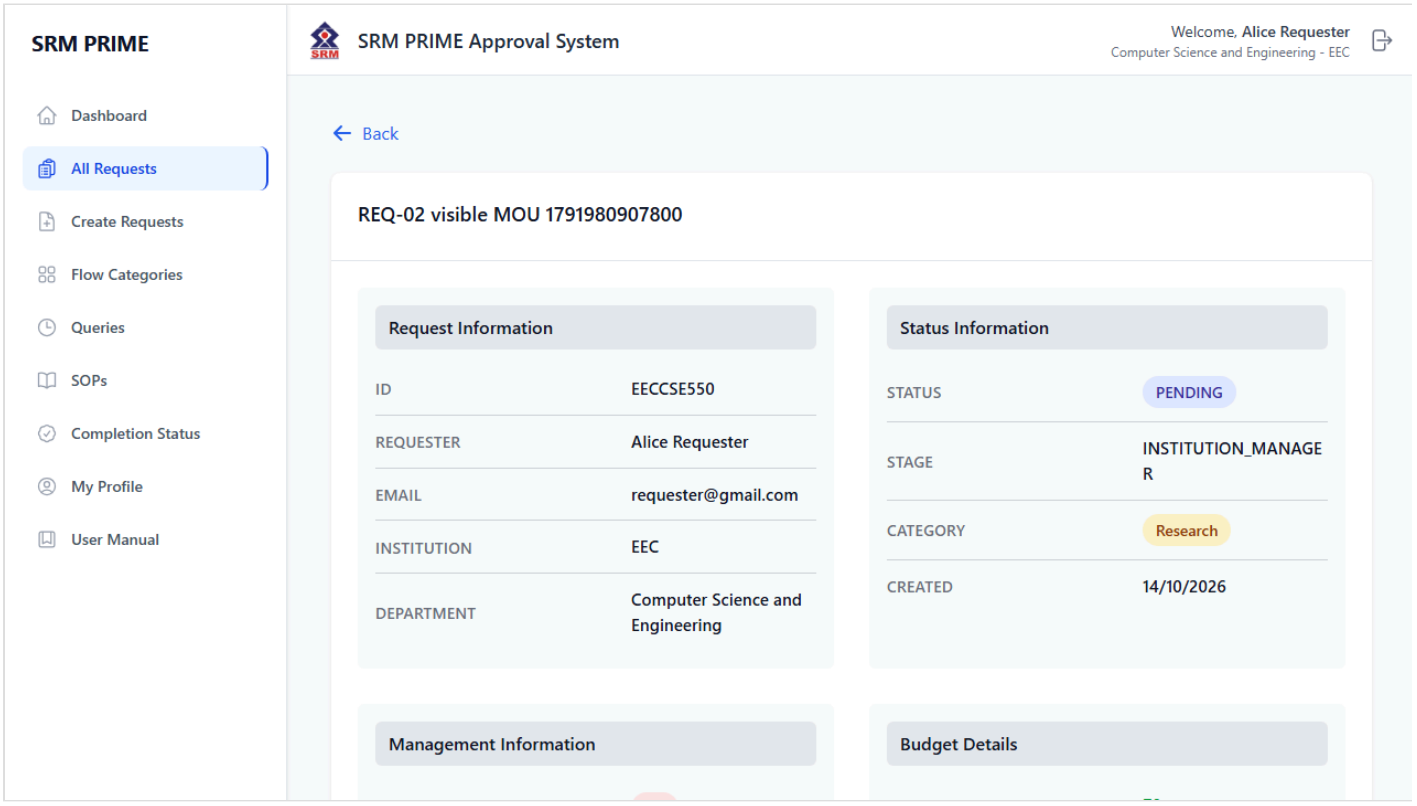

RBAC-NAV REQUESTER: sidebar shows only permitted entries - PASS

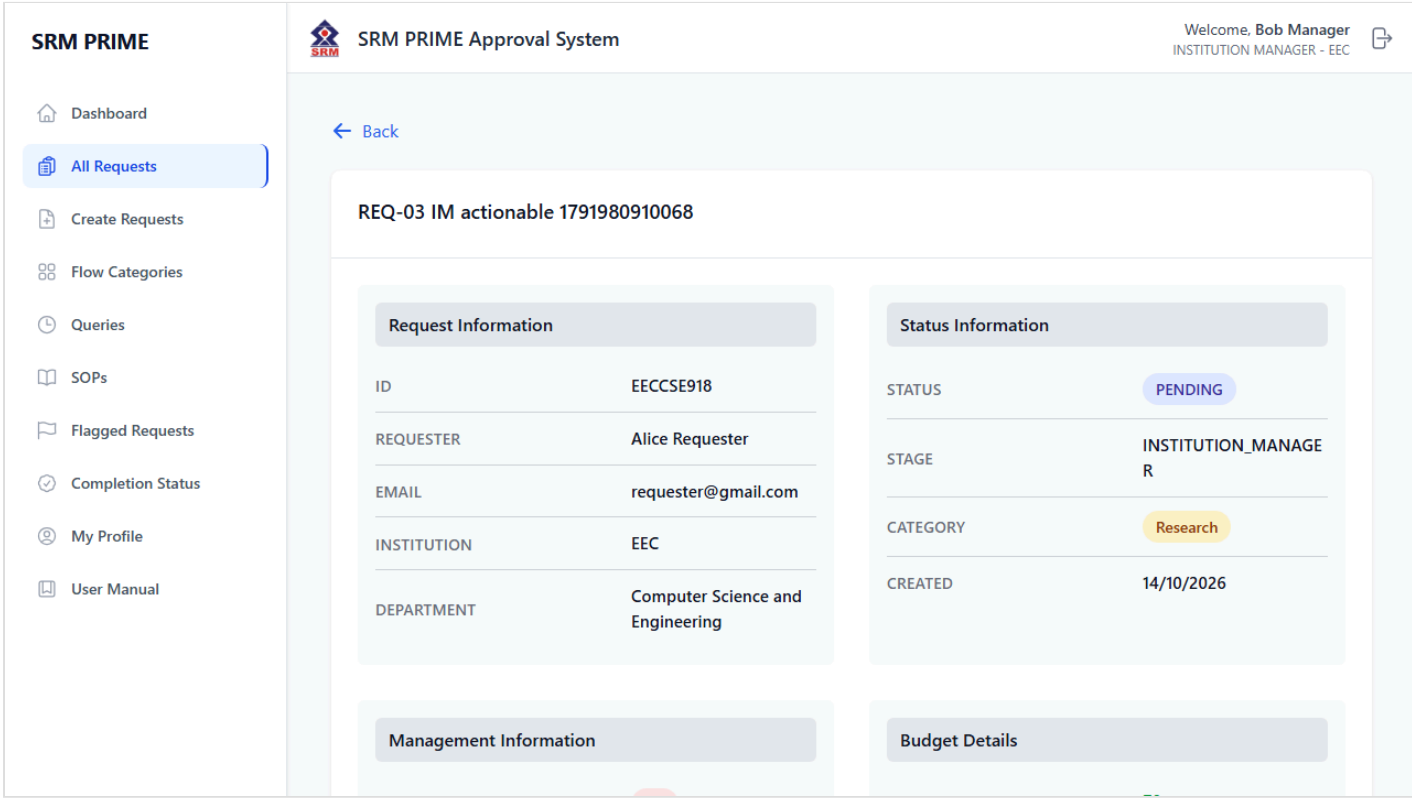

RBAC-NAV HEAD_OF_INSTITUTION: sidebar shows only permitted entries - PASS

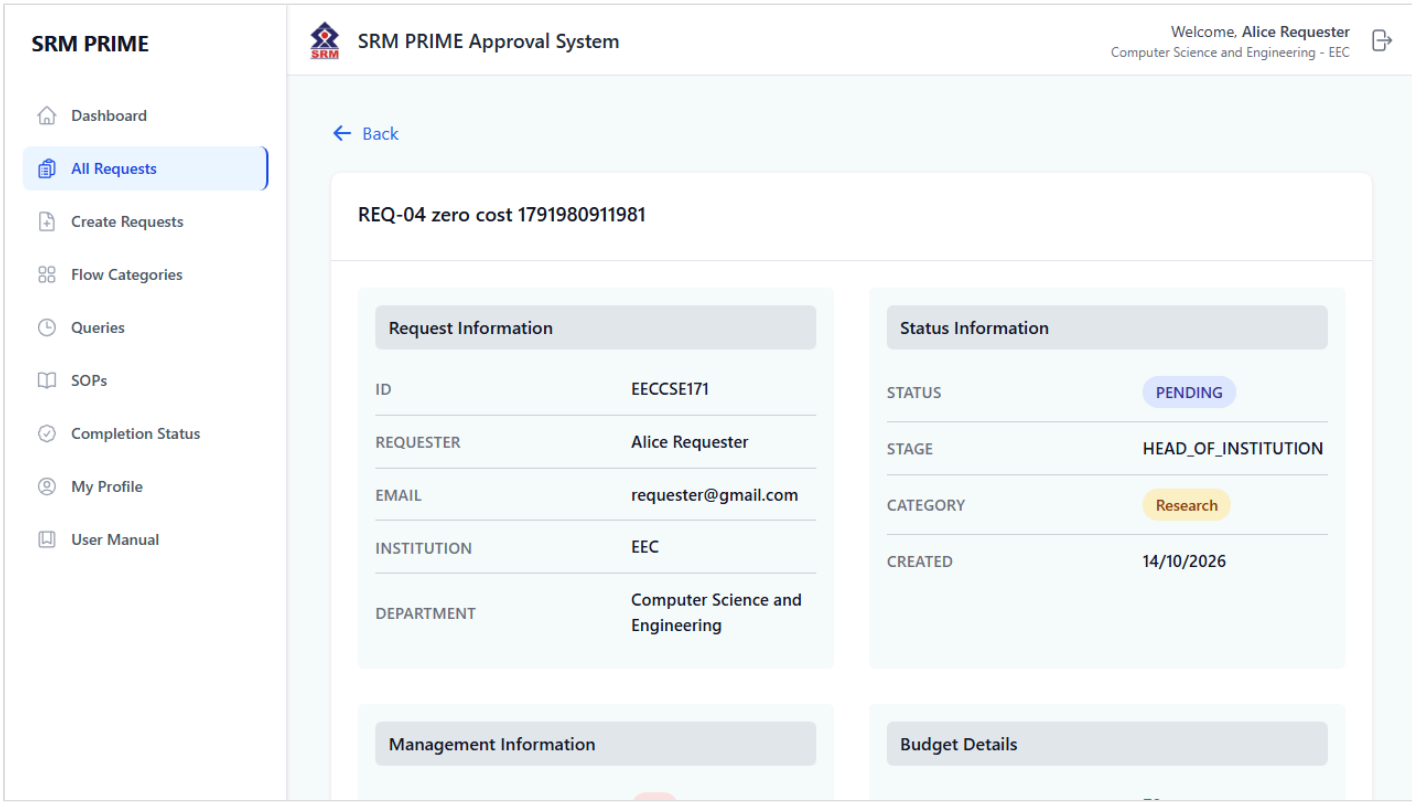

REQ-02 requester sees their request in All Requests and can open it - PASS

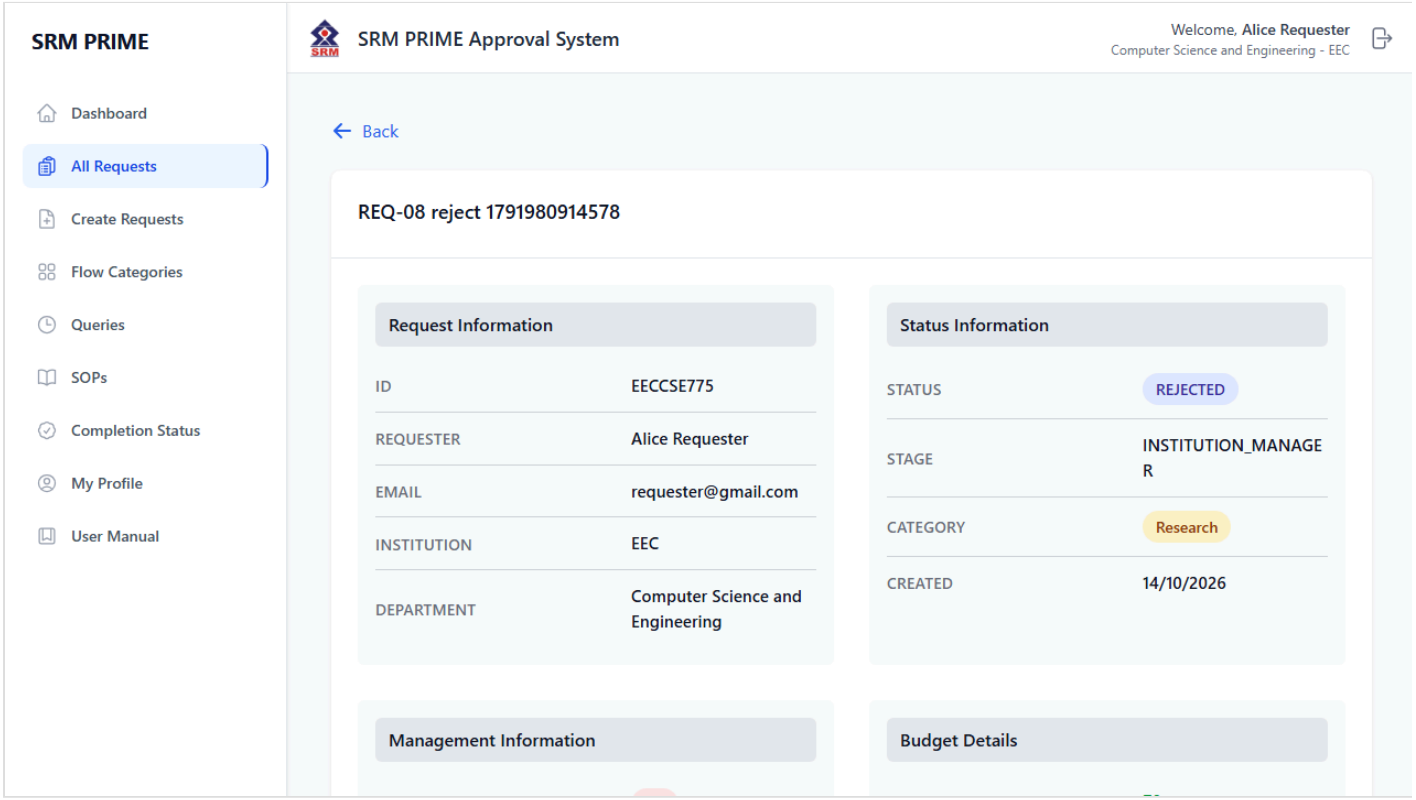

REQ-03 stage holder (Institution Manager) gets the Process Request action - PASS

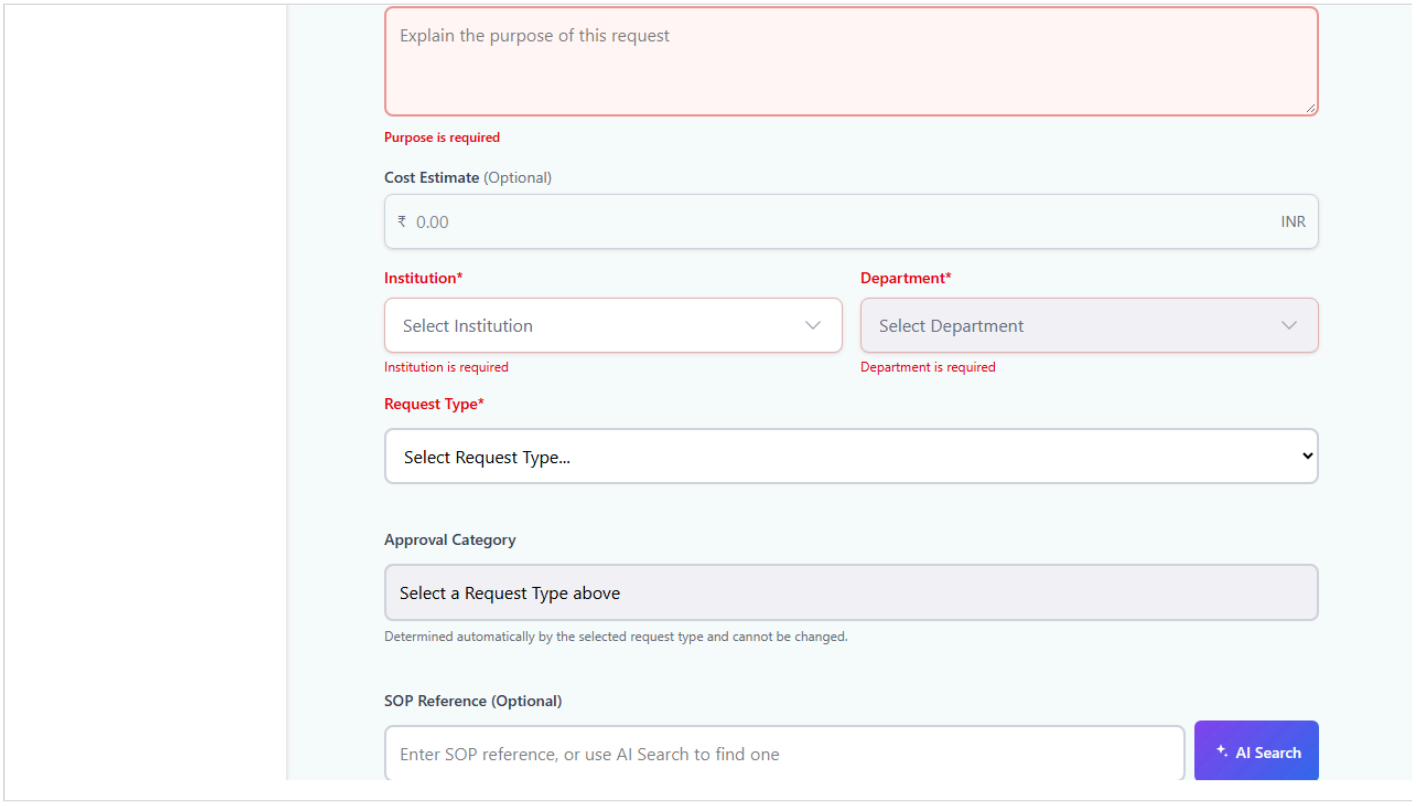

REQ-04 forwarding a zero-cost request skips the accountant (UI reflects new stage) - PASS

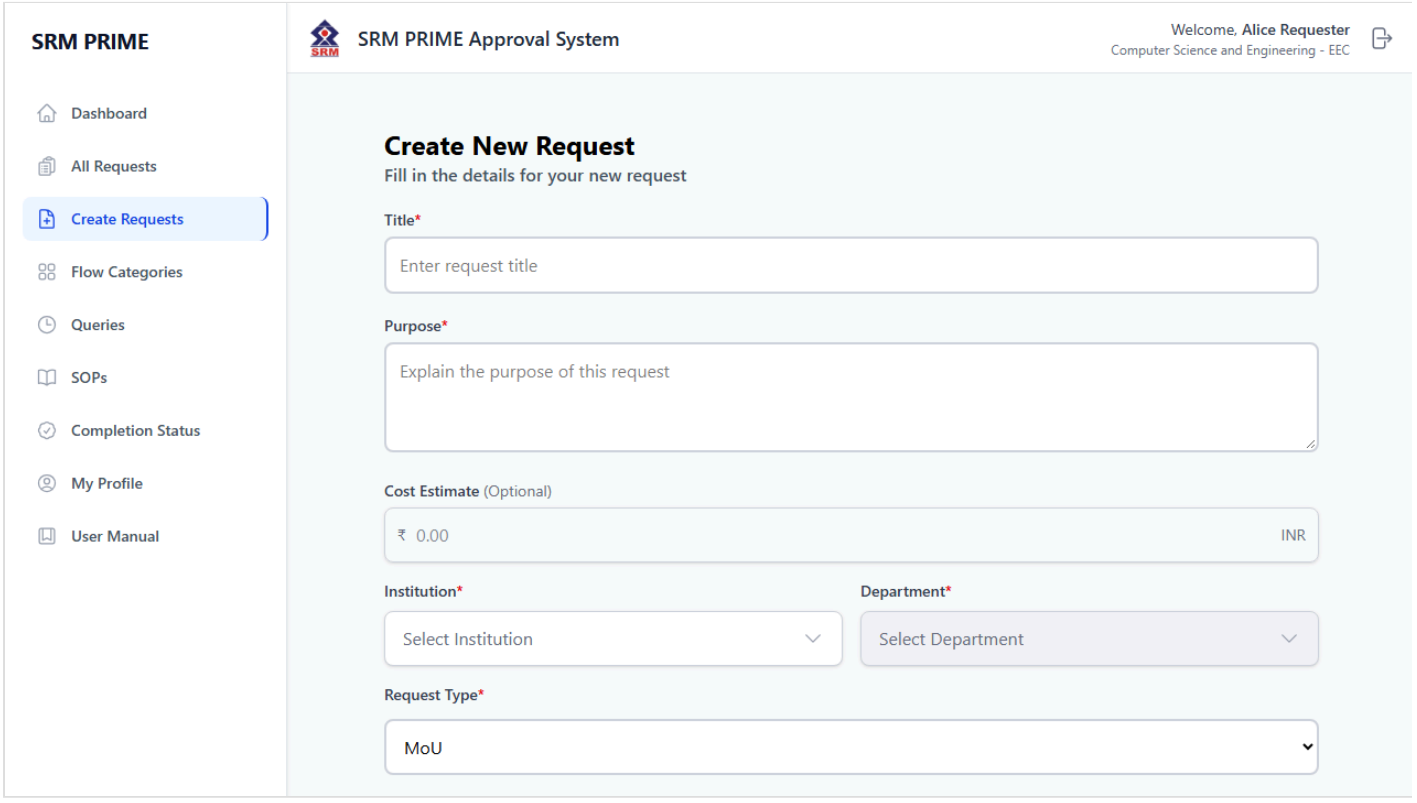

REQ-08 rejecting a request moves it to REJECTED and the UI shows it - PASS

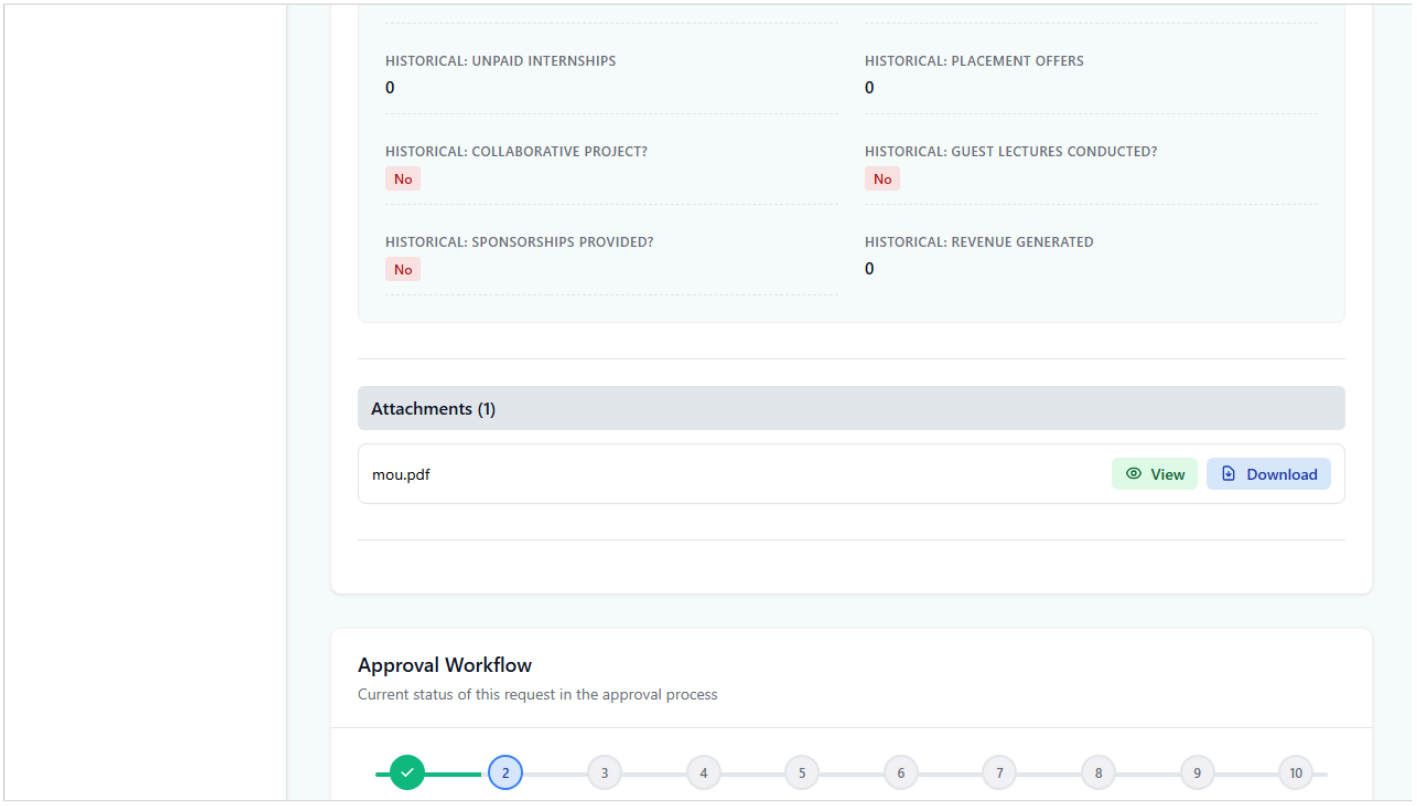

FORM-01 submitting an empty form shows validation errors and does not navigate - PASS

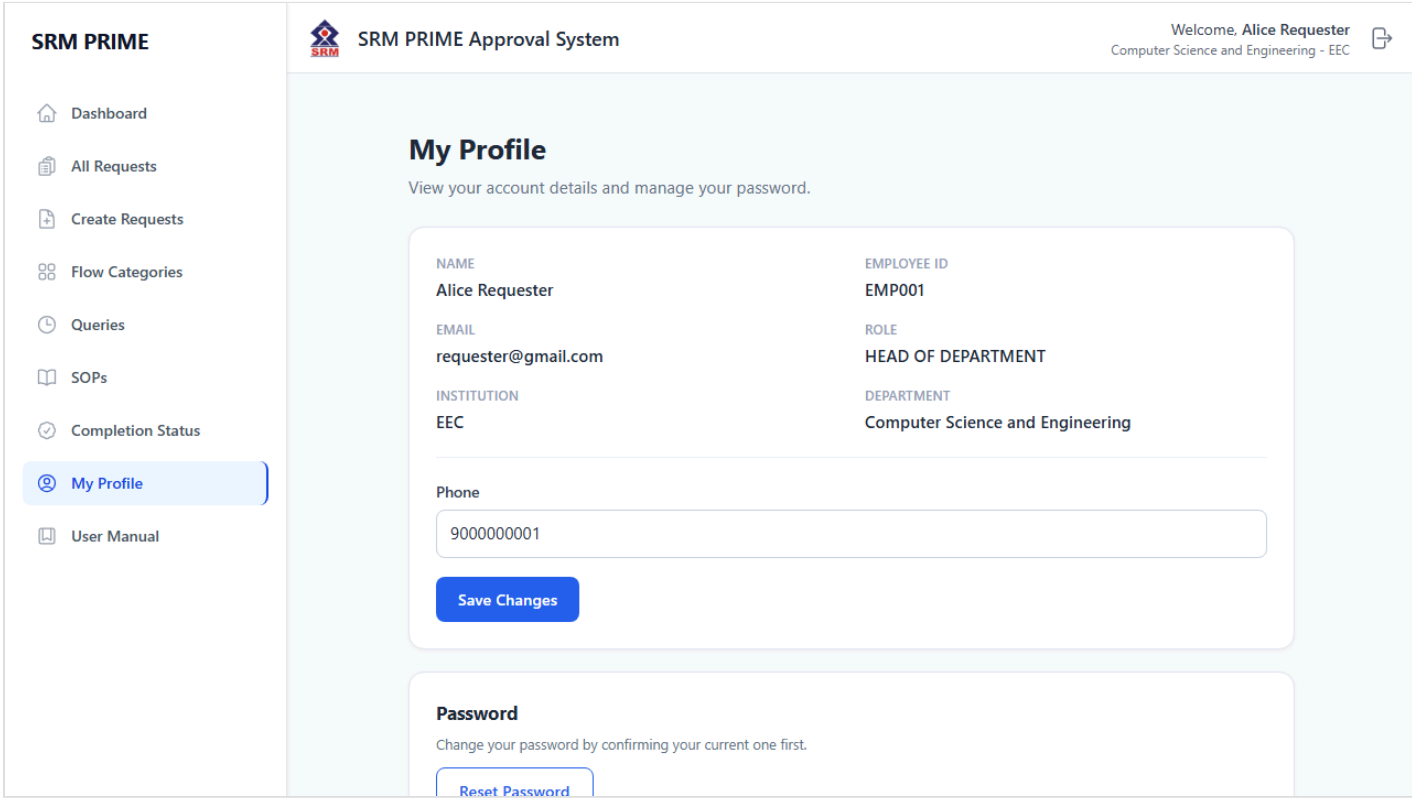

FORM-03 picking a request type reveals its approval category - PASS

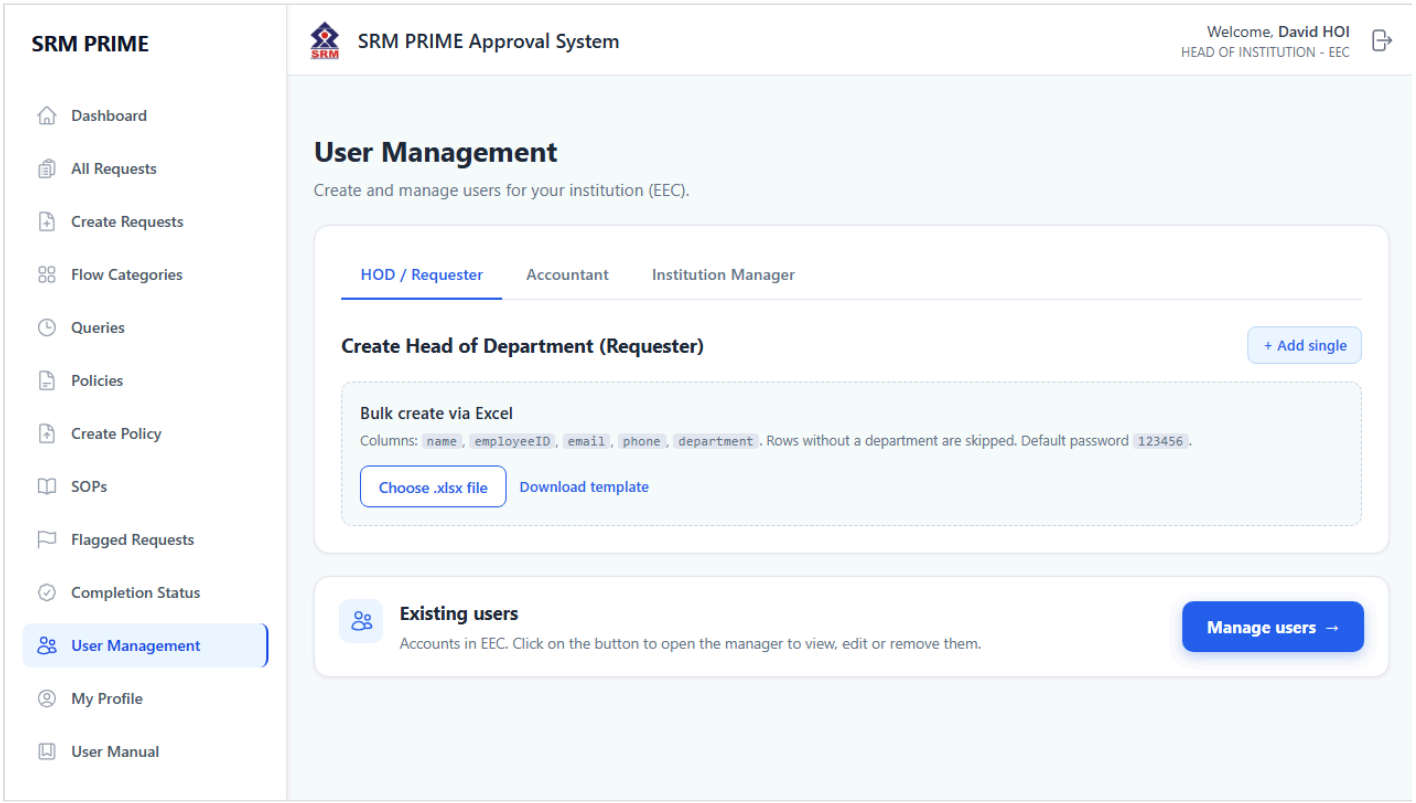

FORM-04 requester submits an MOU request through the form and lands on its detail page - PASS

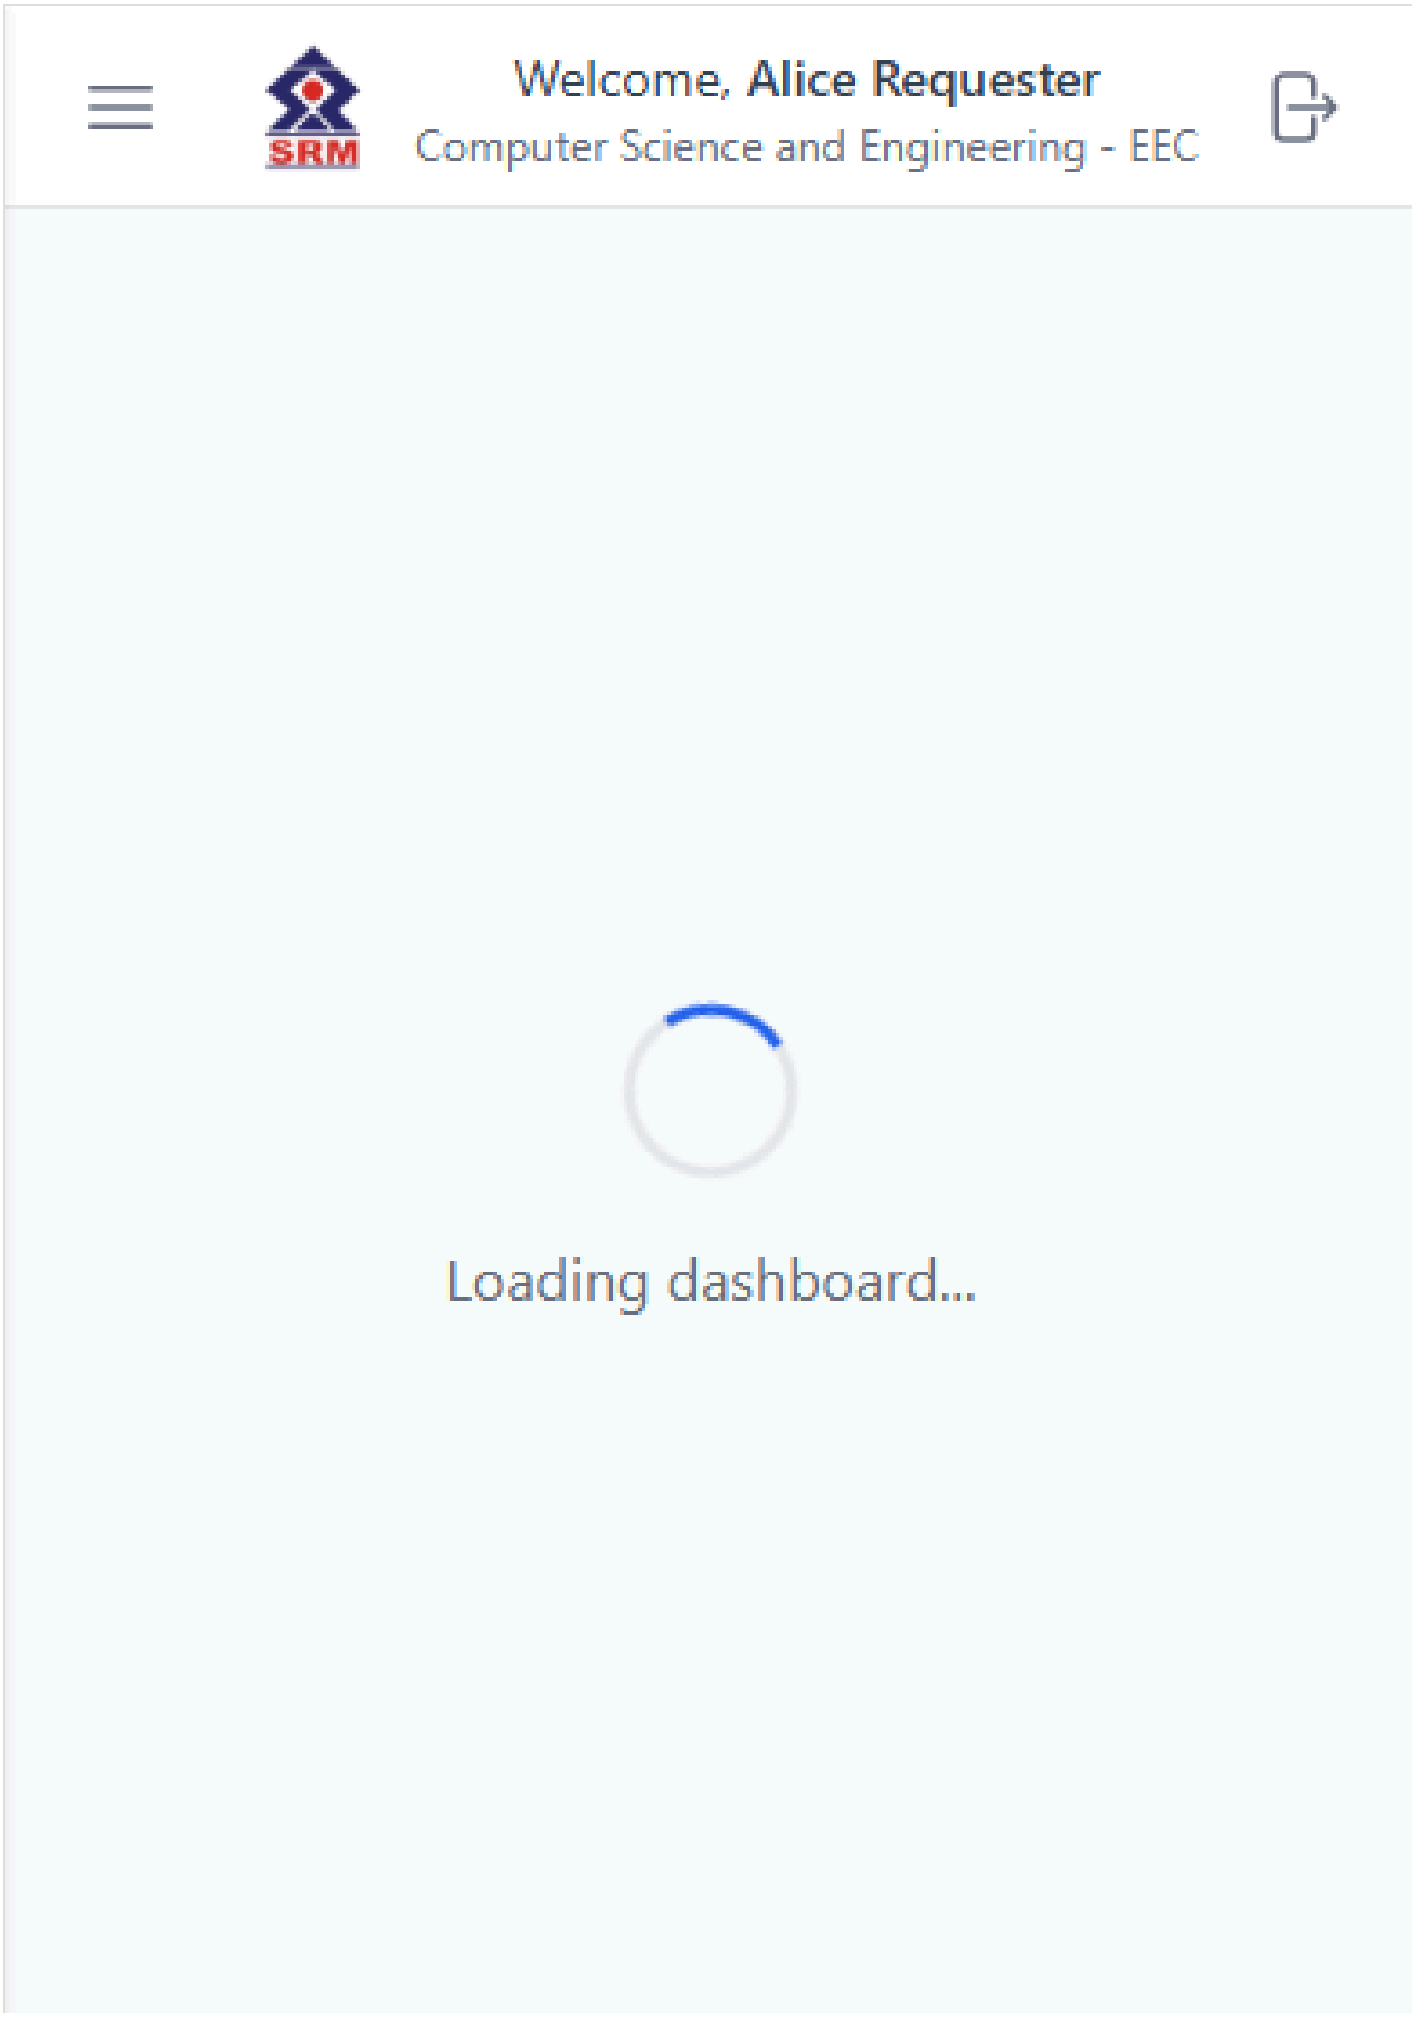

MISC-01 My Profile shows the signed-in user's details - PASS

MISC-05 Head of Institution user management lists users - PASS

MISC-09 mobile viewport collapses navigation into a drawer - PASS

6. Scope and limitations

- The new Head of Institution category dropdown has **no automated browser test yet**, and the new backend branch has no dedicated test. This run did not exercise them.
- Not covered: outgoing e-mail delivery (stubbed), SOP AI search / OCR, Excel-to-PDF conversion, later approval stages through the UI, policy approval flow, non-Chromium browsers.
- Run against an isolated environment; production-only configuration (nginx, TLS, real SMTP, data volumes, any upstream body-size limits) is not verified. A post-deploy smoke check is recommended.
- The unused file backend/app/middleware/body_size_limit.py remains in the repository (it is not loaded).

7. How to re-run

Test DB: docker compose -f backend/docker-compose.test.yml up -d
Backend: cd backend; .venv\Scripts\python -m pytest
Browser: cd frontend; npm ci; npx playwright install chromium; npm run test:e2e
